4	3 Hatching Chicks	190 wins .50

Seal Card Instructions

In addition, there are 18 "Types of Chicken" hold tickets with numbers ending in red 13's (013 through 1713). Once the game is completely sold out, the operator will open the top window on the seal card marked "\$250 Seal Winner 1 Wins"; the player holding the Type of Chicken and hold number that is under the seal will win the \$250 prize. The \$250 winner will then proceed to pick a window to be opened from the windows numbered 1 through 10. The player holding the number that is revealed will win \$50. The \$250 winner continues to pick one window one at a time until a window is opened that reveals their own hold number. At that time the \$250 winner will win all of the prizes remaining under any unopened windows and the game is over.

Example: The \$250 winner picks one window at a time, each window revealing hold numbers that are not the hold number of the \$250 winner. Each player holding the numbers that are revealed win \$50. After opening four windows, the fifth window that is picked by the \$250 winner is their own hold number. The \$250 winner would win an additional prize amount of \$300 as that is the total amount remaining under the unopened windows. If the first window the \$250 winner picks reveals their own hold number they would win the entire additional prize amount of \$500.

If the game is not completely sold out in one day, the players will sign the seal card on the line corresponding with their hold ticket. This is to ensure when the game is completed, the player will receive their winnings.
